

## At Risk for Chronic Absence October 2025 Reports

### AT RISK FOR CHRONIC ABSENCE REPORTS

These reports provide a monthly snapshot of student attendance across Maryland's local education agencies (LEAs). It displays the percentage of students in each LEA who have missed 10% or more of their enrolled school days.

### PURPOSE

The fundamental purpose of collecting this data is to help both LEAs and the Maryland State Department of Education (MSDE) identify attendance challenges as early as possible in the school year. With regular monthly updates, MSDE can monitor attendance trends statewide, identify emerging patterns, and collaborate with LEAs to develop and implement evidence-based strategies to support students facing attendance barriers.

### MARYLAND'S COMMITMENT

Maryland is working to improve student attendance across the state, targeting a reduction in chronic absence from 30% in 2022–23 to 15% by 2025–26. This data provides LEAs with timely data to help support students throughout the school year.

### ABOUT THIS DATA

- Updated monthly during the 2025–26 school year and displays percentages at both LEA and state levels
- Based on preliminary enrollment and attendance figures, final numbers may differ from year-end reports
